

INDIANA UNIVERSITY

SCHOOL OF MEDICINE

June 7, 2007

Mr. Marion Crum
Executive Director
Cryptic Masons Medical Research Foundation
446 Arch Way
Franklin, IN 46131

Dear Marion:

When I think of the success of the Indiana Center for Vascular Biology and Medicine under the leadership of Dr. Keith March, I remember our initial discussions yeas ago about the Cryptic Masons' vision to create a world-class research center to advance treatments for patients suffering from atherosclerosis.

Now you have done it! Patients are coming from all over the country to the IU School of Medicine for treatment of peripheral artery disease in the only FDA-approved clinical trial in the United States.

We appreciate your loyal support. Thank you for your recent gift to support this most gratifying work.

Sincerely,

A handwritten signature in blue ink that reads "D. Craig Brater".

D. Craig Brater, M.D.
Vice President, Indiana University
Dean and Walter J. Daly Professor,
Indiana University School of Medicine
